

Dear Valued Customer and Partner,

We are pleased to announce an important milestone in our global growth strategy: the alignment of our heat transfer fluid portfolio under a single, unified global brand – **SOLUTHERM™**.

Effective September 9, 2026, our Direct-to-Chip (DTC) liquid cooling fluids will be marketed and sold under the **SOLUTHERM™** name, with **the same formulations, specifications, and quality standards across all regions**.

Why This Change?

This announcement represents Phase 1 of our broader global brand alignment initiative and applies only to DTC products at this time. Additional product lines will transition to the SOLUTHERM™ brand under future phases, with further communications to be shared across our full portfolio of products (currently sold under brands KOSTChill, BioChill, Recofreeze, and Recotherm).

This change supports our long-term strategy to operate as a **single global market leader** in thermal management. Unifying under SOLUTHERM™ enables:

- A consistent global product architecture with similar technical documentation and labeling worldwide
- Simplified qualification and specification across multinational deployments
- Stronger technical support and lifecycle management for mission-critical applications
- Clearer branding for customers operating large-scale, multi-region infrastructure

What Is Changing – and What Is Not

While the **brand name and SKU structure** will be updated, it's important to emphasize what remains the same:

- **No performance changes:** Thermal efficiency, operating ranges, safety profiles, and approvals are unchanged. The same trusted inhibitor formulations will remain in place.
- **No disruption to supply:** Manufacturing, quality standards, and sourcing remain consistent.

What is changing is how we present and align our products globally, making it easier to support SOLUTHERM™ fluids across multiple sites and regions.

Transition Timing

During this time, you may see both legacy and SOLUTHERM™ branding on the market. Starting **September 9, 2026**, the new SOLUTHERM™-branded DTC products will begin rolling out to the market.

SKU Cross-Reference

To support a smooth transition, we will provide a clear cross-reference between current product SKUs and the new SOLUTHERM™ SKUs.

Looking Ahead

We are also actively expanding the availability of SOLUTHERM™ DTC products into additional regions, including EMEA and APAC. Stay tuned as this global rollout will continue and take effect over the coming months as regional transitions are implemented.

Thank you for your continued trust and partnership. If you have any questions or would like to discuss how this transition affects your company, please contact your account representative or our technical support team.
